Improve and Fortify your Business IT Defences

The Computing Australia Group offers in-depth penetration testing for businesses

The CAG security consulting team have over 20 years of experience in securing Business networks. We will find your vulnerabilities and secure your IT systems

How Penetration Testing Works

Our testing methodology is based on industry best practices and advanced testing tools. Our approach mimics actual attacks closely for maximum efficiency. A typical test usually contains the following steps

- ◆ Information Gathering
- ◆ Threat attempt
- ◆ Reporting
- ◆ Threat Profiling
- ◆ Risk Evaluation
- ◆ Remediation

OUR PENETRATION TESTING SERVICES
