NOT ALL WEBSITES ARE CREATED EQUAL

Put your website to work for you –
smart businesses are powered by smart websites.

A great website works
for you, even when your
business is closed.

A Computing Australia
website will help define
your business.

More than just a glossy brochure

A website is more than just a glossy brochure. It is an opportunity to provide clever tools to your clients and staff. You can extend your site with smart forms and automations that can save you time and staff resources.

If you provide opportunities for people to interact with your business, even while you are closed, you are gaining an advantage over your competition.

Our initial consultation can help expose opportunities for your website that you were not aware of.

PURPOSE

WEB STATS

1%

of users click
on page 2 in Google

30%

of visitors only click
the top result

60%

The top 3 positions
account for 60%
of all clicks

25%

of all business can't be
found in Google!

More than a glossy brochure

You can have the most beautiful website on the web, but if people can't find your site, it is not helping your business. The goals of a Computing Australia website are that:

- Potential new clients can find you
- You get more business and grow your customer base
- Existing clients have a reason to keep visiting your site
- You gain business efficiencies and save money in the long term
- Staff get added benefits from interacting with your website
