Getting your Website Basics Right

We ensure that your site is well-positioned to rank highly in the SERPs and drive long-term organic traffic growth.

Technical SEO refers to the practice of optimising a website to improve its search engine ranking. It is a highly specialised area of SEO that requires a deep understanding of how search engines and web development work

What is Technical SEO?

Technical SEO is the process of optimising a website for search engines. It covers a wide range of techniques, from optimising website structure, codes and tags, server configuration and redirects to delivering content faster and ensuring the website is mobile-friendly. It is accessible to search engines. Technical SEO ensures the website is accessible to search engines and can be indexed properly. It is an ever-evolving field, and those who want to stay ahead of the curve must continually update their skills.

TECHNICAL SEO INCLUDES

OPTIMISING WEBSITE STRUCTURE

CODES AND TAGS

SERVER CONFIGURATION

Why is Technical SEO important?

Technical SEO is an integral part of any search engine optimisation strategy, as it helps ensure that your site can be easily found and indexed by search engines. Technical SEO can be a complex and time-consuming process, but it is essential for businesses that want to rank highly on search engine results pages (SERPs). When done correctly, Technical SEO can help increase the quantity and quality of traffic to a website. As such, it is an essential consideration for any business that wants to make the most of its online presence.

What you get with The CAG Technical SEO

The CAG Technical SEO services start with an audit and a thorough understanding of the current state of your website. New website? We ensure your website code is clean and follows search engine technical guidelines. Our Technical SEO professionals have a strong understanding of how the search engines work and how they index websites. They work closely with the web development and content team to ensure that your website is optimised for the search engines.
