Build Your Online Presence and Be Found

Do you want a Google My Business Profile that delivers business? The CAG can setup a technically compliant GMB listing & manage it for you.

A GMB listing improves your local SEO, provides information to your customers easily and improves the overall user experience.

Why a Google My Business listing matters

It doesn't matter if you run a brick-and-mortar shop or an online business; your customers are online and they need to find you. Google is the largest search referrer and whether you are looking for foot traffic or web traffic, it helps to have a Google My Business account.

A few features of GMB include images, store timings, contact information, link to your website, relevant articles that you post and also an events page.

DO I WANT IT FOR MY BUSINESS?

The average bricks and mortar business gets most of its business from local customers. People looking for a particular product or service will more often than not search for it in a particular location.

For example – The Computing Australia Group would want to be found if people searched for SEO companies in Perth or WA.

Your website probably already has the right details, but if you want to profit from the boost you can get from Google Maps and Google Local, you need a GMB Listing.

Our Marketing Team at The CAG has immense experience in creating Google My Business profiles for hundreds of businesses.

Combined with our knowledge in SEO, SERP, Content Writing and Managing social media, we know what it takes to make your business shine.

We don't just create your listing and leave you at that. We make sure your GMB account actually thrives.
