# A truly independent consultant for all your internet & telecommunication needs

Internet & telephone solutions supported here in Perth by a West Australian business

**Work with an independent consultant who can design the best solution, using the best telecommunication services. Our consultation is cost effective and is usually easily offset by the savings you will make against the solution we recommend.**

## Internet & Phone Systems

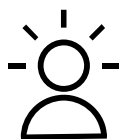

Thinking of Internet & Phone Systems? The Computing Australia Group is here to assist you.

Right choices make a successful business. Choosing an internet provider is a big decision for a business. There is a myriad of confusing terminologies to be careful about and a wide range of options to choose from. A lock-in contract makes it even harder to accept a deal. Browsing through the choices often leaves you with more questions than answers.

The CAG consulting team will analyse your business needs and assist you. By taking into account your current setup, your goals and the allocated budget, we'll help you select the best phone system for your business.

## A GOOD IP TELEPHONE SYSTEM WILL HAVE FEATURES THAT INCLUDE

### EASY SELF MANAGEMENT

### SCALABILITY

### GOOD WARRANTY PLAN

## Choosing an Internet Service Provider

Not every ISP is created equal.

When you choose an ISP there are many considerations but the most important two are speed and bandwidth. You also need to think about contract length, dedicated IP addresses, equipment requirements and more for your internet connection.

Most businesses are heavily dependent on the internet for accessing online resources like Office 365 / email, internet accounting systems like QuickBooks or Xero. There are also services like offsite backups or cloud computing solutions.

The Computing Australia Group can also design effective network and wireless solutions and then source reliable contractors to complete the job for you under our project management.

Getting your Managed Service provider involved is a great way to ensure that all aspects of your internet connection, phone service, network and computing infrastructure work seamlessly well together.

**Internet & Phone Systems in Perth – for a no obligation consultation please contact us at any time.**
