# Fully customised solutions to improve your business processes

Smart tools to manage your Business

**Change the way you do  
Business with a Computing  
Australia Job Management  
System. Our job management  
systems are backed by a  
dedicated support team –  
7 days a week Help Desk**

## **Benefits of a Custom Job Management System**

Businesses waste a lot of time and as we know, time is money. We have seen customers using a multitude of software packages to run their businesses. This creates inefficiency and frustrates staff, also making it difficult to train and retain new staff. We are confident that a Computing Australia job management system will streamline your business and save you money, easily paying for the initial investment.

## SERVICES OFFERED

---

**7 DAY  
HELP DESK**

**CLOUDSUITE**

**WARRANTY  
MANAGEMENT**

**ACCOUNT  
MANAGERS**

### Job System Uses

There are many uses for a Computing Australia job management system. We have successfully customised solutions to help clients with job tracking, project management, customer relations and process management. If you are looking for a custom job management system – give us a call and we will show you ways to streamline your operations and save money.

### Job Management Solutions

Are you looking for an online job management system to manage customer service or staff support requests? Computing Australia has a range of custom solutions to fit your specific needs. A common problem with buying an off-the-job system is that you and your staff are expected to change the way you work to fit into the software. This approach doesn't work – we know because we tried it! In fact, we tried every ticket system we could find and it gave us more problems than it solved.
