

We supply, install, manage,
maintain and support
everything we sell

Warranty Management

We manage warranty support, so you don't have to. We keep a register of all IT equipment and liaise with vendors on your behalf.

Brand Agnostic

We offer every major brand under one roof. You choose the brand you are happy with and we can supply and install onsite.

5 Star Support

We back everything we sell with a 7-day help desk. We work when you do, to ensure your IT systems keep working!

WARRANTY MANAGEMENT

Warranty Management

A compelling reason to put your IT sales through The Computing Australia Group is our complete warranty management service. We maintain a register of your warranties and track things like warranty expires and renewals.

If something is faulty, we do the leg work at no additional charge – don't waste hours liaising with suppliers. We can contact them on your behalf and arrange warranty replacement or repair. It is all part of the service.

We also offer loan devices to replace a faulty item while you are waiting for the vendor or manufacturer to do their part.

Asset Management

The Computing Australia Group offers a complete asset management solution. We maintain a full register of client IT assets and track key information like warranty, life cycle and location.

Contact us today to see what we can do for you.
